1st Assignment

1. Define Microprocessor. Differentiate between Microprocessor and Microcontroller with example.
2. Explain evolution of microprocessor
3. Explain applications of microprocessor
4. Explain different component of microprocessor.
5. What is difference between microprocessor and microcontroller.
6. The major difference between the two architectures is that in a Von Neumann architecture
7. Explain microprocessor as a CPU.
8. Explain the organization of microprocessor based system with block diagram.
9. Explain applications of microprocessor.

2nd Assignment

1. Explain the microprocessor architecture and its operations.
2. Explain the bus architecture of 8085 microprocessor.
3. Explain the 8085 microprocessor signals with block diagram.
4. Explain the 8085 microprocessor with its functional diagram.
5. Explain pin diagram of 8085 microprocessor.
6. Explain what do you mean by multiplexing in 8085 microprocessor.
7. Explain the opcode fetch and memory read machine cycles for MVI A, 48H with timing for execution diagram STA,LDA,lxi adi ldax,stax with suitable data
8. Explain the 8085 microprocessor addressing modes with example.
9. List the features of 8086 microprocessor with its block diagram.
10. Write short notes on: Control and Status Signals, Flags, Instruction Cycle, Machine Cycle, T-States.

11. Define Assembling. Explain the merits and demerits of Assembly Language Programming.
12. Classify the 8085 Instruction Set with example.
